

EndPoint Secure for Healthcare

EndPoint Secure in Action: Millions in HIPAA Fines Wiped Clean

A physician relies on an iPhone to access medical reference libraries, patient records and lab results—in addition to calendar scheduling, voice and text messaging.

On a speaking engagement abroad, the iPhone is stolen—on a bistro table one minute, gone the next.

Without hesitation, the physician calls the hospital where he is on staff and directs the IT department, equipped with EndPoint Secure, to wipe all information from the device, which is done by the IT department remotely in a matter of minutes.

Healthcare-Specific Challenges

Physicians and healthcare workers increasingly depend on their own mobile devices to access medical and patient data at the point of care. At the same time, healthcare organizations face greater liability and fines if found out of compliance with HIPAA under a new audit program mandated by the 2009 HITECH Act, where the maximum penalty was increased to \$1.5 million.

While mobile technology improves the quality and cost of patient care, it increases IT workloads and the potential for information security and HIPAA compliance risks. IT is expected to manage all of these risks while improving the productivity of your healthcare colleagues and keeping them happy by allowing them to use their own mobile devices.

EndPoint Secure Healthcare Solution

EndPoint Secure enables organizations to secure electronic protected healthcare information (EPHI) on all mobile devices connecting to their network, comply with HIPAA and other regulations, and reduce the IT workload and cost of managing mobile devices.

Using EndPoint Secure, Mobile Device Management (MDM), Mobile Application Management (MAM), and document and expense management can be easily and instantly integrated into broader enterprise programs for IT governance, data security and regulatory compliance.

Key Benefits

- Gain 360° visibility and control of all mobile devices, apps, documents and files
- Automate password, encryption and policy enforcement
- Ensure anytime, anywhere device and data security with immediate remote action on nonconforming devices
- No infrastructure changes required
- Rapid implementation
- Low implementation costs and no-fuss maintenance
- Expense management to control costs and overages

Key Features

- Cognitive insights and contextual analytics
- Supports all mobile devices from a single console
- Advisor Alerts to stop threats before they happen
- A real time policy recommendation engine
- An AI ChatBot and voice assistant for mobile users
- Mobile threat management
- Cloud identity management
- Security management
- Remote locate, lock and wipe (full and selective)
- Blacklisting, whitelisting and requiring apps
- Real-time reporting and analytics

Control All Devices

EndPoint Secure gives healthcare organizations coordinated visibility and control over all devices and operating systems, from Apple iOS to Android, Windows Phone and BlackBerry. Integrated dashboards, analytics, and reporting provide actionable intelligence about their entire mobile environment through a single console. IT administrators can quickly visualize the distribution of devices, apps and documents across platforms, approval status, device capabilities, ownership, compliance status and more to control the risks of physicians and healthcare workers using mobile devices to access medical apps and patient records.

Improve Mobile Information Security and HIPAA Compliance

EndPoint Secure provides the ability to know and control information security safeguards on all mobile devices – and react rapidly to lost or stolen devices to ensure regulatory compliance with HIPAA, Health Information Technology for Economic and Clinical Health Act (HITECH), Federal Information Security Management Act (FISMA), Sarbanes-Oxley (SOX), Federal Rules of Civil Procedure (FRCP) and other statutes. IT departments can:

- Push policies and Wi-Fi, email and VPN profiles OTA
- Quarantine new devices automatically until authorized to access your network
- Wipe sensitive data from lost or stolen devices remotely
- Blacklist applications and block device access
- Enforce passcode protection, encryption, and security updates

Control Mobile Applications

EndPoint Secure application management allows healthcare organizations to easily manage and secure the applications that are critical to your users (e.g. Electronic Health Records (EHR), Computerized Physician Order Entry (CPOE), Diagnostic Imaging, Patient Vitals Monitoring, Point of Care, etc.). An on-device application provides users with a catalog of authorized private and public apps. Users can view the apps made available to them, install apps, and be alerted to updates. IT and other departments can manage the master app catalog and per-user authorization. Application lifecycle management provides real-time software inventory reports, app distribution and installation tracking, update publishing, provisioning profile management, and app security and compliance management.

Certifications and Compliances

EndPoint Secure is certified and compliant with—

- HIPAA.
- FISMA authorized
- ISO 27001 certified
- FedRAMP certified
- NIST certified
- FIPS 140-2 validated
- AICPA SOC-2 Type II certified

Reduce IT Workload and Costs

With EndPoint Secure's true SaaS model, there are no servers to install, no complex configurations or infrastructure changes, and no investment in expensive business software. Built on a secure, multi-tenant cloud architecture, EndPoint Secure's enables instant enterprise mobility management in just minutes with effortless scalability, whether from ten to tens of thousands users, and seamless integration into existing enterprise systems. Additionally, EndPoint Secure's eliminates the strain and expense that rapidly changing mobile devices and applications used by physicians and healthcare workers can have on IT organizations by automatically incorporating the continuous stream of platform updates.

Why EndPoint Secure - A Fully Managed Service

Proven approach to cloud-based mobility management

Powerful management & security to address the full mobility lifecycle

Seamlessly integrates with all of your existing infrastructure

Simple & fast with an exceptional customer experience
