

Cut down IT infrastructure and data breach related costs by up to 30% with Blockchain technology.

Blockchain is reinventing the way we live and work today! Interestingly, more and more businesses are waking up to the idea of Blockchain. From food supply businesses that are becoming smarter and safer to supply chain management organizations that are freeing themselves from legacy processes and laborious paperwork, Blockchain is powering a new league of agile and secure business networks.

As a leading digital transformation (DX) partner, we at Futurism Technologies, Inc. take great pride in helping our clients create reliable, sustainable and tailored Blockchain solutions and ecosystems that deliver maximum value. We help our clients explore a wide range of Blockchain services including Blockchain development, consulting, ICO development, Cryptocurrency exchange and development, Wallet development, frameworks development, smart contract audits and much more.

Comprehensive suite of market-ready Blockchain offerings

We offer a comprehensive suite of Blockchain services to guide your entire Blockchain journey. We strive to provide our clients with market-ready Blockchain solutions that address real business challenges and contribute to the bottom-line.

POC DEVELOPMENT We produce comprehensive mock-ups to test ideas in real business scenarios to identify gaps and test the functionalities of the project.	SMART CONTRACT DEVELOPMENT Our experts develop secure and proficient Smart Contract code to automate the execution of processes in Ethereum and HyperLedger Fabric.	PRIVATE BLOCKCHAIN DEVELOPMENT We develop a private, permissioned Blockchain to address the client's specific business requirements by utilizing cryptography to store data immutably on a distributed ledger.
HYPERLEDGER & MULTICHAIN DEVELOPMENT We develop decentralized applications using permissioned Blockchains like HyperLedger Fabric and Multichain for Finance, Healthcare, Retail, Manufacturing, etc.	ETHEREUM APPLICATION DEVELOPMENT Ethereum enables the development of Smart Contracts and Distributed Applications. Our blockchain app developers can design a decentralized/distributed Blockchain app for your organization.	SOLIDITY EXPERTS Ethereum based applications and smart contracts are written in a language named Solidity. It is used to execute smart contracts in any Blockchain.

Blockchain Development:

Customized Blockchain solutions including POC development, Smart Contract development, Private Blockchain development, Hyperledger and Multichain development, Ethereum Application Development and Solidity Experts solutions. Leverage our highly trained and technical experts to not only build the finest and secure Blockchain solutions, but also to re-engineer and turbocharge business operations through Blockchain integration.

Blockchain Consulting:

Understand and evaluate existing processes, painpoints and business-specific challenges. Identify relevant use-cases to get the most out of Blockchain. We create strategic roadmap to pilot and deploy Blockchain solutions with full transparency. Post deployment optimization and support included.

ICO and Cryptocurrency Development:

End-to-end ICO and Cryptocurrency development services for businesses of all sizes. Leverage our pool of ICO developers and Cryptocurrency experts to design, integrate and launch Cryptocurrency solutions.

Cryptocurrency Wallet Development:

We can develop a fully functioning and secure Cryptocurrency wallet that facilitates seamless transactions and secure storage across a broad spectrum of Cryptocurrencies. Be it decentralized wallet development, mobile/web wallet development or Cryptocurrency exchange platform development, our Cryptocurrency wallet development are fully scalable that support high-end trading functions.

Cryptocurrency Exchange Development:

We can develop a fully functioning and secure Cryptocurrency wallet that facilitates seamless transactions and secure storage across a broad spectrum of Cryptocurrencies. Be it decentralized wallet development, mobile/web wallet development or Cryptocurrency exchange platform development, our Cryptocurrency wallet development are fully scalable that support high-end trading functions.

BENEFITS OF OUR SERVICES:

Our server virtualization services help organizations to rapidly simulate and manage test environments to deliver topnotch software at a faster pace whilst reducing costs and business risks to end users.

Cryptocurrency Exchange Development:

We can develop a fully functioning and secure Cryptocurrency wallet that facilitates seamless transactions and secure storage across a broad spectrum of Cryptocurrencies. Be it decentralized wallet development, mobile/web wallet development or Cryptocurrency exchange platform development, our Cryptocurrency wallet development are fully scalable that support high-end trading functions.

Blockchain Framework Development:

We can help you develop tailored Blockchain frameworks and prototypes leveraging our technical knowhow, industry expertise and strategic partnerships across platforms. Our custom-built Blockchain frameworks can be augmented with several critical applications and industries such as healthcare, supply chain, energy, identity management and many others.

Smart Contract Audits:

We offer smart contract audits services to ensure modern and industry best Contracts Development practices. Leverage our proven 5-point methodology to identify security issues and flaws.

STAGES OF OUR BLOCKCHAIN CONSULTING PROCESS

Why Futurism for Blockchain Development?

We are that smart kid on the Block(chain) technology. Here's why Futurism for Blockchain:

- Reduce costs and redundancies across operations through automation
- Customized and developer –friendly Blockchain solutions
- Build Blockchain solutions that seamlessly integrate with your existing enterprise software and cloud services.
- Deploy fully managed Blockchain networks
- Hands-on expertise working with leading blockchain technologies/platforms including Ethereum, Hyperledger, Ripple and others.
- Improved security (virtually tamper proof solutions)
- Improved customer experience
- Improved operational efficiency
- Flexible payment options (no hidden costs)
- Dedicated Blockchain team and COE
- Scalable engagement model
- Agile Blockchain development services

To put Blockchain at the heart of your digital transformation journey, reach us now at [+1 \(732\) 790-2938](tel:+17327902938) or [drop us a note here](#) for a **FREE** consultation.
