

IoT Services

Delivering IoT solutions that scale at the speed of light

From smart cities to smart workplaces and smart homes to smart factories, IoT is reimagining every aspect of our lives. In fact, a staggering number of businesses today are waking up to the idea of IoT to market faster, create disruptive business models/networks, and deliver exceptional customer experiences. Futurism helps make IoT real and tangible, connecting the best of both the worlds; i.e. physical and digital worlds to deliver actionable business intelligence.

Whether you are looking to expand or fortify your existing IoT network/solution for added security or to add more connected mobiles, devices/wearables or design a new IoT solution tailored to fit specific business needs, we provide comprehensive opportunity assessment, consulting and transformation roadmap strategy to help you get the most out of your IoT investment.

Usher in the era of a connected world with our comprehensive suite of IoT services

Futurism's IoT services suite has the expertise to help you build unparalleled IoT capabilities that will help you create new revenue streams, drive operational efficiency, curb costs and maximize return on investment (ROI).

📌 **IoT Strategy & Advisory Services:** Our expert IoT team can help you identify/uncover opportunities by conducting a comprehensive opportunity assessment and help you define the most apt IoT roadmap for your business. Right from ideation to market, Futurism will be your sidekick throughout the journey.

📌 **IoT Design/Build Services:** We assess your readiness to IoT, define a vision, set data handling rules and design a robust IoT solution roadmap. Be it conceptualizing a new product or reinventing an existing one, Futurism can help. Right from technology selection to integration and device management, Futurism can help.

📌 **Cloud IoT Services:** Our IoT solutions include pre-coded software, security and hardware building blocks to help you send data to the cloud seamlessly minus coding hassles thus, speeding up your IoT deployment. Our cloud IoT services ensure robust and secure IoT cloud infrastructure, optimum device connectivity, remote device management, real-time analytics, decoupling apps and much more. Cloud platforms include AWS, IBM, Microsoft Azure, Google, and more.

SERVICES Digital IOT Services

Futurism offers scalable and repeatable vertical software-as-a-service (SaaS) applications that are each already 60 percent complete - so you won't need to build from scratch.

Our IoT experts will help you customize and complete the solution to fit your specific needs.

Our Digital IoT services include:

- Smart Factory
- Smart Warehouse
- Smart Healthcare
- Smart Connected Worker
- Smart Office
- Smart Retail
- Smart Asset Monitoring
- Smart Fleet Management
- Smart Building
- Smart Cell Tower Monitoring
- Smart City Solutions
- Smart Diesel Generator Monitoring
- Smart Energy Monitoring
- Smart Facility Monitoring

Why Futurism for IoT?

Fully scalable IoT services tailored to help make your business future-proof!

- ✓ One-stop hub for all your IoT requirements
- ✓ Complete IoT process and systems optimization
- ✓ Seamless interoperability between different IoT systems/networks
- ✓ Cybersecurity - managed security service for all your endpoints
- ✓ Global expertise
- ✓ Better user experience
- ✓ Custom IoT solution design/development and integration
- ✓ Outsource support for IoT systems development
- ✓ Predictive maintenance/analytics and intelligent analytics
- ✓ Global standards and compliance
- ✓ Reduced costs and downtime
- ✓ Rapid ROI
