

Futurism Web Security

Stop web threats before they reach your endpoints or network.

→ Did you know?

- The web is used in more than 90% of malware attacks and is the second-most commonly used vector for cyber attacks.
- Over 18 million websites are infected with malware at a given time each week
- More than 50% of cyber attacks on small businesses are web-based

It's not difficult to see why web security and visibility are essential. Futurism's Web Security protects against malicious web activities, blocks business-inapt websites/URLs and helps reduce shadow IT risks caused by web threats.
