

Digital Transformation in Hospitals

Creating a Smart and Connected Care System

Digital transformation (DX) in healthcare is mainly about adopting new technologies to deliver exceptional hospital-patient experiences. There are many opportunities to reduce cost and improve care experience.

Did you know?

Telehealth adoption in the US has exploded to around 3,000% since the beginning of the COVID-19 crisis, taking much of primary care to people's homes rather than being tied to a doctor's office or hospital. (Source: Healthcare IT News)

Futurism being a proud member of the American Hospital Association has been assisting hospitals and healthcare providers irrespective of their size leverage digital technologies to digitize their operations and provide on-demand patient care.

Futurism: Creating Patient-Centric Healthcare Centers

Business Continuity with Cloud

- ✓ Access to data anytime, from anywhere, from any device
- ✓ Backup/recovery
- ✓ Data security

Digital Front Door

- ✓ Web presence/mobility
- ✓ Patient Portal
- ✓ Live chat
- ✓ Social media
- ✓ Appointment setting

EHR Integration

- ✓ Integrated patient data
- ✓ Appointments
- ✓ Billing/ledger
- ✓ Medical history
- ✓ EDI interface integration
- ✓ Prescription automation
- ✓ Insurance/claims integration

Process Automation

- ✓ Paperless administration
- ✓ Automated appointment scheduling, follow-ups and check ins
- ✓ Improved asset/drug and inventory management
- ✓ Medical history
- ✓ Insurance
- ✓ Billing

Improved Diagnostics

- ✓ Reading MRI, CT scans, X-rays, etc.
- ✓ Data analysis

Managed Security Services

- ✓ Ransomware
- ✓ Email, Web and Network
- ✓ Vulnerability assessment
- ✓ Pen test
- ✓ Endpoint
- ✓ Mobile
- ✓ Applications

Why Futurism for Digital Transformation in Hospitals?

We use a stepwise approach to creating a seamless digital transformation framework that paves way for an iterative project approach for a 'self-funding' DX journey that can quickly yield an ROI.

Benefits of Digital Transformation for healthcare industry at a glance:

- ✓ Enhanced Patient-Hospital relationship
- ✓ Better care experience – including patient-anywhere telehealth
- ✓ Improved and intelligent diagnostics
- ✓ Efficient medicated assisted treatment (MAT)
- ✓ Improved business continuity
- ✓ Mobility - Data storage, access, backup and recovery
- ✓ Improved operational efficiency
- ✓ Enhanced and smart revenue utilization
- ✓ Security

The future is digital, the future is now and healthcare is no exception!
